Subject: Documents for ARSG Meeting

Dear Stakeholders – Sorry this is getting to you so late before tomorrow's meeting, but I just received these documents.

First is a spreadsheet summarizing the responses we have received so far about all the InnoCentive solutions. (Thanks to Kirstin and Bill) They are all ranked in tiers and initial comments are provided. Interesting ideas, but nothing jumped out as a silver bullet. We will still need to decide which solutions we will award over the next two weeks or so.

Second is a sampling plan from Dan Wall of EPA for this field season. Below is an email from Dan as well.

Hope to see you in Silverton tomorrow afternoon at 2:00.

Peter Butler

970-259-0986

Hi Peter

Attached is the "Final" 2014 sampling plan for the Animas. We ran out of time to distribute for comment to try and beat runoff, but we will be back for a couple more events this year and can modify the sampling if you or the stakeholders would like revisions.

Can you please distribute to the group?

Dan Wall
